

~~CONFIDENTIAL~~7 May 1959  
Control No. 150/55

MEMORANDUM FOR: Commerce DCF Member

FROM: CIA DCF Member

SUBJECT: Electro-Technical Laboratories, Houston: Receipt  
of Inquiry for Underwater and Marsh Gravity Meters  
from Sharpe Instruments, Limited, Toronto

25X6A

CLEARANCES

1. The attached document has been cleared for dissemination to Foreign Service posts in Canada for ACTION classified ~~CONFIDENTIAL~~ and for ACTION to the Department of Commerce classified ~~CONFIDENTIAL/NOFORN~~.

2. It is requested that where CIA source descriptions or numbers are known, no mention of these be made in any further dissemination of this material. Please advise this Agency of the use made of the information contained in this report.

COMMENT

3. It should be noted that Sharpe's 1957 attempt to obtain a Warden gravity meter prompted a rash of attempted diversions of this meter. Since Sharpe was representing Communist China in his previous diversion attempt, it appears quite likely that he is again attempting to purchase the gravity meters for their account.

4. Electro-Technical Laboratories produces portable seismic systems as well as gravity meters. Since this apparatus is also used in geophysical exploration complementing the data obtained from gravity meters and would require license for export to all destinations but Canada, it is not unlikely that the Chinese would have included several of these systems in their order if they are indeed the "would be" end-users. It is suggested, therefore, that Electro-Technical Laboratories be questioned regarding possible inquiries from Sharpe or other Canadian firms attempting to purchase seismic systems as well as gravity meters.
